Operator overloading

Operator overloading

We can implement standard operators for our custom structs

```
use std::ops::Add;
```

Operator overloading

We can implement standard operators for our custom structs

```
use std::ops::Add;
```

```
struct Custom {
   ...
}
```

Operator overloading

We can implement standard operators for our custom structs

```
use std::ops::Add;
```

```
struct Custom {
   ...
}
```

```
impl Add for Custom {
   type Output = Custom;
   fn add(self: Custom, other: Custom) -> Custom {
      ...
   }
}
```

Operator overloading

We can implement standard operators for our custom structs

```
use std::ops::Add;
```

```
struct Custom {
   ...
}
```

```
impl Add for Custom {
   type Output = Custom;
   fn add(self: Custom, other: Custom) -> Custom {
      ...
   }
}
```

```
custom1 + custom2
```

Operator overloading

Overloadable operators
